

## Water Sports

Many people visit Barbados to get their fill of the sun, sea and ... more. If the sea is your thing, you will definitely find a paradise here.

Water sports abound on the island from surfing to jetskiing, parasailing, deep sea diving, snorkelling, scuba diving, sailing and fishing.

Jet skis are a great way to zoom around on the ocean waves and show off for your land-bound friends. Parasailing offers another and certainly wonderful view of the coastline, while rubber rings and banana boats will get you soaked while tickling you silly.

For those interested in more casual water play, taking a trip on a catamaran or yacht will suit you perfectly. And if you would love to choose what is served to you for dinner, you can go deep sea fishing for the "catch of the day".

For the really adventurous, Barbados boasts a number of wrecks along its shoreline that will make your diving experience one not easily forgotten.
